

ApprovalMax for Xero

Approval automation solution that integrates with Xero. Eliminating all manual approval processes and tightens financial controls.

- ✓ Creates robust financial controls with budget checking and Bill-to-PO matching
- ✓ Connect with Xero and set-up approval workflows within minutes
- ✓ Approvers and Requesters do not need to access to Xero
- ✓ Multiple approvers, conditions and stages
- ✓ ApprovalMax mobile app and email

ApprovalMax is a cloud-based platform that extends the functionality of Xero, to provide finance teams with automated and conditioned based approval workflows for documents including but not limited to purchase orders and invoices.

ApprovalMax replaces manual and email-based approvals with fully automated multi-tiered approval workflows. Allowing accounts payable (AP) and accounts receivable (AR) teams to save precious time, manage their spend and regulatory compliance for accounting and financial services as well as report on and audit completed approvals. Detailed workflows allow teams to easily set-up unique approval workflows to suit complex business processes.

When all decision makers have approved documents via desktop or the ApprovalMax app, Xero automatically updates their status to approved and finance teams can access auto generated audit logs that track every step and detail. ApprovalMax for Xero allows for finance teams to implement tighter and robust financial controls.

Keep approvers out of the accounting system

Granting everyone access to the accounting system is not safe because it's impossible to limit users in terms of what they can do or see there.

ApprovalMax approvers don't need access to the general ledger and only ever see information relevant to the documents that require their approval.

Flexible approval workflows recreate your delegation of authority policy

The approval workflows can be as complex or as simple as you need them. You can implement a variety of rules for each approval step and have as many steps as you like. No matter how complex your delegation of authority policy is, it can be automated with ApprovalMax.

Automatically generated audit reports

You no longer need to waste time compiling audit logs.

ApprovalMax creates for each approved document a detailed audit report, which gets attached to it in the accounting system.

There is also the option to provide auditors with access to all the approval workflows in read-only mode so that they can easily view and analyse your approval process.

Eliminating paper and manual approvals

ApprovalMax is the key app for enabling truly paperless accounting: no need to print out invoices to have them signed off, or send them by email and chase approvers afterwards. We save you that effort by automating the entire authorisation process.

ApprovalMax has made our invoice and expense authorisation process so simple. It's easy to use and there's no need for approvers to have access to Xero.
