Get your approval automation and financial controls sorted by integrating ApprovalMax with Cin7 Core.

Quickly set-up
approval workflows

Approve everything
in **one place**

Keep approvers
out of Cin7 Core

Tighten financial
controls

Prevent fraud

ApprovalMax is a cloud-based platform that integrates with Cin7 Core to enhance internal financial controls, security, and efficiency. It brings finance and procurement teams together by **automating approval workflows** for inventory related purchase orders and invoices.

Accounts payable and finance teams can utilise ApprovalMax to **establish automated approval workflows. These workflows pull purchase orders and invoices directly from Cin7 Core and QuickBooks Online**, sending them to relevant stakeholders for approval when specific conditions are met.

“This has filled a hole in the expense management area in inventory which has been quite weak. ApprovalMax being the best approval tool in the app ecosystem, is expanding again and solving a problem.”

✓ Approve everything in the one place

When QuickBooks Online users connect ApprovalMax with Cin7 Core, all approvals are requested, granted, and stored in one place which makes information easier to find. This significantly improves accounts payable organisation, processes, and auditing capabilities.

✓ Customise workflows to suit any situation

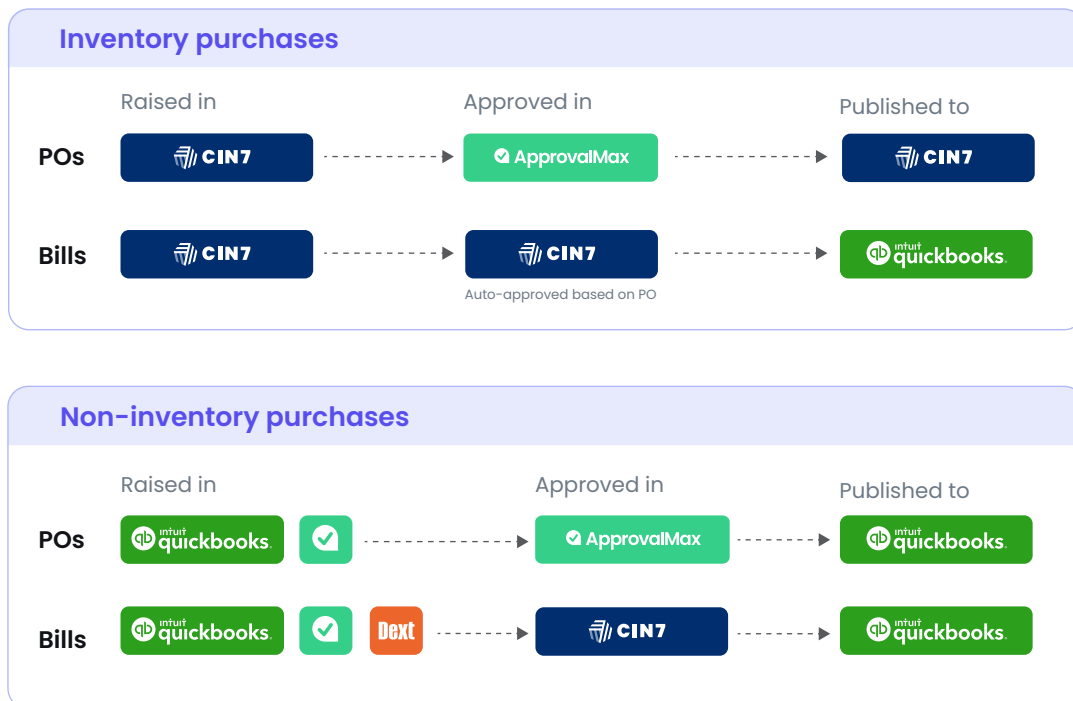

Approval workflows can be created to suit unique business requirements for inventory related purchase orders and invoices. Workflows can be set up with multiple stages (approvers) and conditions specific to Cin7 Core such as product type, category, or inventory account.

✓ Keep approvers out of Cin7 Core and QuickBooks

Improve data security and save on user licenses. With the ApprovalMax integration, you can keep your decision makers out of QuickBooks Online and Cin7 Core. ApprovalMax is the only platform they need to view and approve inventory related bills and purchase orders.

✓ Tighten your financial controls from one place

ApprovalMax offers more than just approval functionality. When connected to Cin7 Core, it allows you to tighten your financial controls by adding in sophisticated processes that can help mitigate fraud, improve cash flow, and audit who is approving bills and purchase orders.
